Emy,

I wanted to follow-up on our telephone conversation this morning. The first item is regarding the meeting that is tentatively scheduled between EPA and ODEQ the week of March 18, 2013 to discuss EPA's comments on the 5-year review. As the meeting will be held in The Dalles, a site walk is also planned. Lockheed Martin would like to attend the meeting and site visit if possible. Once you confirm the meeting schedule, please let me know. I am going to be out of the office that week so Gene Matsushita or another Lockheed Martin representative will likely attend if that is acceptable.

During our call, you stated that approval from ODEQ is sufficient to discharge the treated leachate to the Columbia River under the NPDES permit. EPA wants to receive the emails and analytical data for the discharges; however, approval from EPA is not necessary to commence the discharge. If I did not correctly understand this, please let me know.

Finally, you mentioned that you had left a message on my voicemail on Friday. I double-checked my messages and did not receive a voicemail on my office or cell phone. Can you confirm that the number that you have for me matches the numbers in my signature block below? I have experienced some problems with my office voicemail and am concerned that it is reoccurring.

I think that is all. Please let me know if you have any questions or anything further that you would like to discuss.

Thanks,

Brian
